I agree to have the rebate money allocated for the above property as indicated on this application. I understand a rebate will be issued only if the GSHP system(s) meets the program requirements. Palmetto Electric Cooperative may inspect the system(s) to insure proper compliance with the terms of this program. I also understand PEC does not, in any manner, warranty or guarantee any GSHP system installed under the terms of this program and does expressly disclaim any responsibility for the proper installation and/or operation of any system(s) installed hereunder.

Buried Treasure[®]

Purpose:

This program is designed to promote the installation of Ground Source Heat Pumps by Palmetto Electric Cooperative, Inc. members. Participating members will reduce their energy costs, help reduce peak electric demand for Palmetto Electric Cooperative, Inc., and help postpone the need to build additional power generating facilities.

Rebate:

\$200 rebate per ton is available for installation of Ground Source Heat Pumps.

The maximum rebate is \$1,000 per home.

Only Palmetto Electric Cooperative, Inc. members are eligible.

General Requirements: (Must be met to qualify for rebate)

ONLY Ground Source Heat Pumps (GSHP) will qualify.

Installations may qualify in both new construction and existing homes.

Installations must be in compliance with all state and local codes and ordinances.

GSHP sizing must be determined by ACCA Manual J load calculation.

The use of auxiliary or back-up electric resistance heaters is not permitted.

Prior to any drilling or excavation, "Dial Before You Dig" (888-721-7877) must be contacted to determine the location of all underground utilities.

The GSHP installer must be a licensed S.C. Mechanical Contractor.
